## **DETAILED ACTION**

### ***Claim Objections***

Claims 2 and 6 are objected to because of the following informalities:

1. Claims 2 and 6, each on line 1, delete ""the arms" and insert --the main central member--.

Appropriate correction is required.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Bedortha et al. (5,000710).

2. As to claims 1-8, Bedortha et al. disclose a flotation device for water aerobics comprising a piece of foam shaped to form a main central member (34) and a pair of float arms (A) wherein each arm terminates in a slot handle (B) and the arms are flexibly attached to the main central member such that they can bend (see Appendix 1, Examiner's Version of Fig. 2 and Col. 3, lines 3-5). The main central member is relatively larger than the arms; thus it inherently has greater buoyancy than the arms. Claims 4, 5 and 8 include claim language describing methods of using the device. Since the claims are primarily drawn to a device and not a method of use, that language has been disregarded.

***Conclusion***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The following references disclose flotation similar floatation devices.
